SHRINKABLE FILM

GREEN FILM

deal for “one-step” systems, semi-automatic and automatic L-sealers with shrink tunnel.

It is a totally recyclable and therefore ecological film, suitable for food use and at low temperatures, in fact can also be used for refrigerated and frozen products.

Unlike other types of film, it has a very rapid retraction capacity even at low temperatures and excellent sealing even at high speed.

Its properties do not change even after long storages.

It is extremely high transparency and good gloss and it “follows” package shape perfectly.

- Available width: from 200 to 700 mm
- Available thickness: 15, 19 μ m
- Also available microperforated, width. from 200 to 500 mm

BLUE FILM

The shrink film in PVC is a film used both in technical and in food (food PVC). It is a film for packaging very versatile, practical and appreciated, thanks to its transparency, good gloss and its mechanical characteristics that make it a film able to shrinking at low temperatures with excellent results even on small pieces and characterized by an excellent sealing even at high speed.

The PVC film is ideal for “one-step” systems and semi-automatic L-sealers with shrink tunnel

Rolls are available also with 20 cm diameter for small machines.

- Available width: from 200 to 800 mm
- Available thickness: 18, 20, 30, 40 μm

GOLDEN FILM

The Golden Film is an high-tech polyolefin shrink ideal for automatic L-sealers with shrink tunnel.

It is an extremely transparent film which shrinks quickly at both low and high temperature and it have an excellent sealing also at high speed.

It “follows” package shape perfectly and it is ideal for automatic L-sealers with shrink tunnel thanks to its particular cross-linked molecular structure.

It can be used also for food applications.

- Available width: from 200 to 700 mm
- Available thickness: 15, 19 μm

STRETCH FILM

STRETCH FILM FOR MANUAL USE

The manual stretch film is available in different sizes and thicknesses, to better adapt to the different customers needs.

MANUAL EXTENSIBLE FILM is packaged in rools with low weight because it is used manually by the operator. It is a basic product with many applications, suitable for those who pack little or to recondition loads.

This type of film can have different uses to pack and transport the pallet more easily to protect it during transport.

It is applied to “cold” and thanks to its elastic memory and to the self-adhesive surface, it ensures a strong load on the pallet.

In the range of the manual stretch film, there is also the MANUAL EXTENSIBLE PRESTIRED, from the maximum elastic memory that allows to keep the pallet perfectly stable, with a reduced film consumption. Moreover, the reduced thickness and the high elasticity of the film make these coils light and easy to handle.

On request dispenser (available neutral, white, black)

The manual stretch film has the following characteristics:

- Material: stretch
- Thickness: 23 micron standard (on request other thicknesses).
- Manual prestressed thickness: 10 microns (on request other thicknesses).
- Weight per rool: 2.5 Kg
- Rool height: 50 cm
- Color: transparent, white, black (other colors on request)

STRETCH FILM FOR INDUSTRIAL USE

The MACCHINABLE EXTENSIBLE FILM, like the manual film, is packaged in rools with a contained weight.

It is used on turn-table pallet-wrapper and robots. The self-adhesive and elastic film blocks the packaging preventing harmful movements of the load, while keeping it firm and compact.

It has a high capacity to adapt to the shape of the pallet.

It is usually used the transparent machinable film, since it is easy to identify the packaged product but it can also be colored, black and white.

Also for the range of stretchable films that can be machined, we find the PRESTIRED MACHINE EXTENSIBLE, which allows a greater stability of the load on the pallet, a greater resistance to perforation and the sharp edges of the pallet and a reduced consumption of the reel.

The extensible film that can be machined has the following characteristics:

Material: stretch

Thickness: 23 micron standard (on request other thicknesses)

Machinable pre-stretched thickness: on request

Weight per roll: 17 Kg

Roll height: 50 cm

Color: transparent, white, black (other colors on request)

SKINPACK FILM

Materials to be skin-packed on treated cardboards (microperforated or not). Available in rolls: width 390 ÷ 560 mm and with different thickness (100/150/200/250/300 MICRON).

SPECIAL FILM

- **Heat-shrinking polyethylene for sleeve-wrapping**
Available in rolls from 500 to 1250 mm wide. Available thicknesses from 40 to 100 micron.
- **Heat-shrinking polyethylene for bagging machines**
Upon request available in different widths and thicknesses.
- **Single-folded heat-shrinking polyethylene for full closure sealing**
Available rolls from 250 to 600 mm wide. Available thicknesses 25-60 micron.
- **Single-folded, micro-perforated heat-shrinking polyolephine for fullclosure sealing (especially for bread)**
Available rolls from 200 to 600 mm wide. Available thickness: 15 micron.
- **Cling film for food applications**
Available rolls of 1500 mm wide. 11 micron thickness.
- **Printed shrink wrap films**
Upon request, polyolefin films, both laid-out and single-folded, printed in 1 or more colours. Various thicknesses.

ADHESIVE TAPES

High-quality and high-performances adhesive tapes even in extreme climatic conditions. Ideal for tape-sealing goods kept in warehouses or shipped in containers and for protecting goods from theft and illegal opening. Available neutral and personalized with up-to-six-colours logos and scripts in different sizes.

MANUAL USE

- Height: 38/50/75 mm
- Length: 66/132 m
- Colours: white, tawny, transparent

AUTOMATIC USE

- Height: 38/50/75 mm
- Length: 330/660/990 m
- Colours: white, tawny, transparent

HIGH PRODUCTION

For automatic tape-sealers:

- Height: 50 mm
- Length: 1500/2000 m
- Colours: white, tawny, transparent

PERSONALIZED ADHESIVE TAPES

The adhesive tape personalized with your logo is not just your image around the world; it is above all the first deterrent for possible intrusion or manipulation. For these reasons we propose, personalized adhesive tapes with very modern systems that enhance your brands, achieving a level of quality that is decidedly superior for the definition of details, color brilliance and visual impact.

An essential means for those who want to effectively promote the corporate image at low cost.

Available in a wide range of sizes. Possibility of customizing up to six colors.
